Summary

Flexible and dedicated Software Engineer with over two years of hands-on experience in developing reliable applications using Javascript, Typescript, Reactjs, Nextjs, React Native among other tools. Proficient in both mobile and web development, I bring a proven track record of delivering high-quality solutions that meet client expectations. My expertise extends to navigating diverse time zones seamlessly, having successfully collaborated with teams across various regions

Experience

Wardbord **February 2023 – present**
Senior Frontend developer/Mobile app developer
Texas, USA
<https://wardbord.com/>

- Design and implement user interface components for JavaScript-based web and mobile applications using React ecosystem.
- Develop a web app that enables coaches to grade, view, edit as well as to invite players to their team
- Work as a part of a team that includes other react native developers, designers, QA experts, and managers to develop mobile app for players to view grades
- Improve front-end performance of already existing application by eliminating performance bottlenecks
- Create front-end modules with maximum code reusability and efficient

MergeIt Tech **February 2022 – December 2022**
Frontend developer Intern
Kwara State, Nigeria

- Developing applications (coding, programming).
- Debugging and testing code.
- Documenting and testing new software applications.
- Researching, investigating and fixing a wide range of technical issues.
- Collaborating with senior developers in building projects.

Vatebra ltd **January 2021 – June 2021**
Frontend developer
Lagos, Nigeria
<https://vatebra.com/>

- Collaborated with other engineers to build out SAAS applications using an agile methodology.
- Wrote the views for .Net MVC applications, maintaining clean architecture.
- Worked on important features, such as role managements, performance managements and tasks tracking systems.
- Worked with a team of interns to build a Memo and Approval system using javascript and Reactjs
- Implemented designs to build out user friendly applications.
- Maintained applications and provide support for the applications users.

Education

University of Ilorin **October 2015 – October 2021**
Food Science
BSc
<https://undergraduate.portal.unilorin.edu.ng/index.php>

Projects

Wardbord **February 2023 – present**
"Wardbord" is a game-changing tool for coaches, bringing a new level of organization and productivity to their work. By replacing scattered notepads and spreadsheets with a streamlined, digital system.
<https://wardbord.com/>

- Wardbord eliminates clutter and reduces administrative overhead.
- Replaces disorganized notepads and spreadsheets with a streamlined system Creates an effective workflow that prioritizes and enhances coaches' tasks
- Automates the generation of analytics directly from the coaches' work

Wardbord Player App **June 2023 – present**
"Wardbord Player App provides players with unparalleled access to their performance data and coach feedback. Through this innovative application, players can effortlessly view their grades and insightful feedback from coaches, empowering them to track their progress and make informed decisions to enhance their skills.

MoneyHq
A Software App that integrate AI to generate Financial Statetements
